EDUCATION

Carleton University

Ottawa, ON

Bachelor of Computer Science

Sep. 2021 – May 2025

- Relevant Coursework: Abstract Data Types and Algorithms, Database Management Systems, Fundamentals of Web Applications, Object-Oriented Software Engineering, Discrete Structures, Software Quality Assurance, Reinforcement Learning, Operating Systems

TECHNICAL SKILLS

Languages: HTML, CSS, JAVA, C, C++, Python, JavaScript, TypeScript

Technologies/Frameworks/Database: Spring-Boot, React, Next.js, Node.js, Express.js, Tailwind, Bootstrap, JUnit, Selenium, Cucumber, PostgreSQL

EXPERIENCE

Full Stack Developer

Jan. 2025 – Present

Metra Inc

Remote

- Developed a responsive and user-friendly website using **Next.js**, based on designs provided in a **Figma** project.
- Collaborated with the design team to ensure accurate implementation of UI/UX elements and maintain brand consistency.
- Built and integrated backend services using **Spring Boot**, ensuring robust data handling and security.
- Managed source code and version control using **GitHub**, adhering to best practices for collaboration and deployment.
- Optimized website performance and resolved production issues to deliver a seamless user experience.

Customer Service Representative

Jan. 2024 – Present

Enterprise Mobility

Ottawa, Ontario

- Attended customers to ensure satisfaction while they waited for vehicle service.
- Cleaned vehicle interiors and washed, cleaned, and dried vehicle exteriors.

PROJECTS

Carleton Course Notifier | *Javascript, Node.js, PostgreSQL, Express, Puppeteer*

- Developed a full-stack web application that allows Carleton University students to register for notifications when seats in desired courses become available
- Implemented a relational database schema using PostgreSQL to manage users, courses, and registration records
- Implemented backend services with Node.js and Express.js to handle user registrations, course status tracking, and e-mail notifications
- Deployed the application using modern cloud services
- GitHub link: <https://github.com/vitcorr/carleton-course-notifier>

Health and Fitness Club Management System | *Javascript, PostgreSQL*

- Designed a fitness management program using **JavaScript** and **PostgreSQL**
- Implemented the database using PostgreSQL, creating an efficient and scalable structure based on ER-diagram and normalization principles
- Developed backend functionalities using Node.js, ensuring robust and secure data processing
- Implemented the frontend interfaces for members and staff using JavaScript and Pug
- Collaborated with teams to optimize module interactions and overall application architecture
- GitHub link: <https://github.com/vitcorr/Health-and-Fitness-Club-Management-System>

Game of Quests - Test Automation | *Java, JUnit, Cucumber, Selenium*

- Developed a quest-based game in Java, focusing on robust design and functionality
- Conducted unit and integration testing using **JUnit** and behavior-driven testing with **Cucumber**
- Built a web-based version using **Spring Boot** and JavaScript, enhancing accessibility and user experience
- Automated end-to-end testing for the web application using **Selenium** to ensure reliability across browsers
- GitHub link: <https://github.com/vitcorr/A1-kolawole-victor-101201377/tree/a3-4004>

EXTRA CURRICULAR /VOLUNTEER EXPERIENCE

Other Experience: Poulet Rouge (Assistant Manager), Jiffy Lube (Lube Tech), L'Avenue Restaurant (Barista), The Door Youth Centre (Supervisor)

Battle Snake Competition - Carleton Computer Science Society: Created an AI to play snake and compete against other players' snakes

Non-technical Skills: Teamwork, Communication, Time-management, Problem-Solving, Leadership, Adaptability, Multitasking, Attention to Detail
